Attachments: removed.txt

Gentlemen,

Based on the discussions we had this morning this is what I have come up with:

1.) North Contaminant Area
    a.) Tank 7
    b.) Tank 8
    c.) Composite Tank 9 and Tank 10 (I am pulling these together based on VOC Headspace Readings)
    d.) Composite OT-5, OT-1 and OT-4
    e.) OT-6
    f.) OT-3
    g.) OT-2
2.) South Containment Area
    a.) Composite Tanks 1, 3, 4 and 6
    b.) Tank 2
    c.) Tank 7
    d.) Tank 8

If the tanks are noted as composite they will be standalone samples taken per tank. Well run TCLP and Totals along with TSS and TOC if that' not already on there. Other than that we should be good. I do have an email into Intergulf just to see what they would want to see. If he adds anything I'll let you know. If for some reason you don't agree with the approach or think we need to discuss further let me know. Please try my cell as I will be hit and miss this afternoon.

Thanks,
